

your game. your setup.

A Minecraft launcher, made to feel considered.

Vanilla, modded, or your own setup. One quiet identity for the launcher and the companion mod.

slate

always
lowercase.

01 / the brand

Clear. Steady. Yours.

slate gets you into the Minecraft setup you want, with clear controls and room to make it your own.

clear

Useful labels. Honest status. No inflated claims.

steady

Predictable behavior and a restrained visual system.

yours

Choice of versions, mods, layouts and preferences.

how we name things

slate

the brand

slate launcher

the desktop application

slate mod

the in-game companion

slate for Minecraft

an explanatory descriptor

02 / logo system

Primary: horizontal lockup. Symbol: app icons, small spaces and repeat branding.

03 / space and small sizes

x = 1/4 of the symbol height

Keep at least x clear on every side. Measure from the visible artwork, not the file edge. Never change the gap between the symbol and wordmark.

minimum digital sizes

lockup: 108px minimum

symbol: 16px minimum

Use the dedicated app icon for favicons and taskbars. At 16px, verify the diagonal gap on the actual device.

04 / color

graphite
#101413

paper
#F0F4EF

jade
#8BD5AD

surface
#1A211D

muted
#87988D

Graphite and paper do most of the work. Jade marks the action: Play, selection, focus, or a small brand signature.

Use roughly 80% neutral surfaces, 15% text and structure, and 5% jade. This is a layout guide, not a quota.

05 / accessible combinations

foreground / background

contrast

normal text

Primary on graphite
Secondary on surface
Muted on graphite
Button text on jade
White on jade
Light body text
Light accent on white

16.70:1	AA pass
8.40:1	AA pass
6.10:1	AA pass
9.67:1	AA pass
1.72:1	do not use
13.68:1	AA pass
6.30:1	AA pass

Ratios are calculated for solid sRGB colors. Never put white text on jade buttons. Use a visible focus ring and text/icon cues alongside color.

06 / typography

Manrope

Aa Bb Cc Dd Ee Ff Gg Hh Ii Jj Kk Ll

0123456789

The main voice: open, sturdy and easy to read. Use 700 for headings, 600 for controls, 400 or 500 for body text.

your game. your setup.

Display 56/60 | H1 32/38 | Body 14/20

IBM Plex Mono

1.21.1 / fabric

128 MB / 256 MB

00:42 / ready

Use for versions, sizes, timings and logs.
Keep ordinary interface labels in Manrope.

The logo is custom artwork. Use the asset; do not retype it.

07 / voice and naming

Say what happened. Say what comes next.

Unleash your adventure

Experience the next evolution

Oops! Something magical went wrong.

Your epic setup has been optimized!

Brand: always slate. Interface labels: normal sentence case. No forced lowercase everywhere.

08 / launcher application

Brand application example. Flat panels, useful hierarchy, quiet chrome and one clear action.

09 / companion mod application

Use the same brand inside Minecraft. Keep panels opaque enough to read over the world, and leave gameplay space clear.

10 / social and launch graphics

social card / 1200 x 630

avatar / square

Use one message and one signature. Keep social copy short, backgrounds flat and the icon comfortably inside the crop.

11 / guardrails

01

Keep the name lowercase.

slate, slate launcher, slate mod. Never Slate, SLATE or sLaTe.

03

Keep the logo flat.

No glow, gradients, bevels, stone textures or drop shadows.

05

Keep the promise precise.

Avoid guaranteed FPS claims, universal compatibility and unsupported status badges.

02

Keep the geometry intact.

No stretching, rotating, rebuilding the split or adding an outline.

04

Let the layout breathe.

Do not frame every section or fill empty space with decorative cards.

06

Use the right master.

SVG for scalable UI; PNG for raster placement; dedicated icon at tiny sizes.

12 / files and handoff

logos/	Horizontal, wordmark, symbol and stacked. SVG paths + transparent PNG.
icons/	16-1024px PNG exports, SVG master and multi-size Windows ICO.
social/	1200x630 announcement card, 1500x500 banner and square avatar.
tokens/	Tailwind v4 CSS, JSON palette/type/spacing and contrast checks.
fonts/	Manrope variable, IBM Plex Mono, and their original OFL licenses.
guidelines/	This guide and the written brand system with usage rules.

Production SVGs and token files are authoritative. Generated reference artwork is a concept, not a source for exact color or geometry.
